Is there an audio files or pgp Key, into the image which haven't been found yet ?

For the audio files we've been stopped here :

there is a MPEG file 14:39

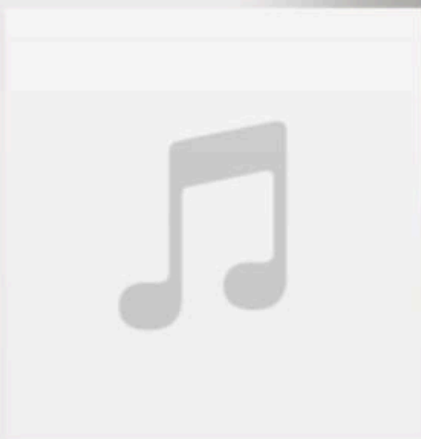

it doesnt play 14:39

 read this, for a quick study on whas possible with zsteg
https://github.com/tghack/tg19hack/blob/master/forensics/plastic_flagtastic/writeup.md

← 1 14:40

we only use basic stuff from zsteg

edited 14:40

Time: 0:54

14:41

it wont play 14:41

but says its 54 seconds 14:41

PLAY FULL SONG

ong is an Enigma by Da Vinci explained here :
That's the conversation that i've found(translated) by Leonardo with his friends about that song

"<<Our great musician rightly proposes a musical conundrum. So... let's see...>> He turned the paper toward the guests, who were pressing to read and trying to guess.

<<There are musical notes in it!>>

<<Before the last note is written "zza.">>

<<The first mark looks like an ear.>>

<<No, you are wrong, it is a letter.>>

<<What are you talking about? It's a fish hook.>>

<<Right, it's a hook!>>

<<And the notes? It looks like a scale to me: re, mi, fa, sol, la.>>

The diners busied themselves for a few minutes, racking their brains over the riddle, when Gian Galeazzo said, in one breath: <<AMO-RE MI FA SOL-LA-ZZA-RE: love makes me sollaze!">> Then he pounded on the table what was meant to be a fist, but turned out to be little more than a light touch, given his weakness.

<<E bravo, Gian Galeazzo. You guessed it>> Leonardo congratulated himself."

☐ **THE SHORT URL** (unresolved)

The protocol will have no involvement in the hosting of images. This will be up to the frontends to filter,display,host.

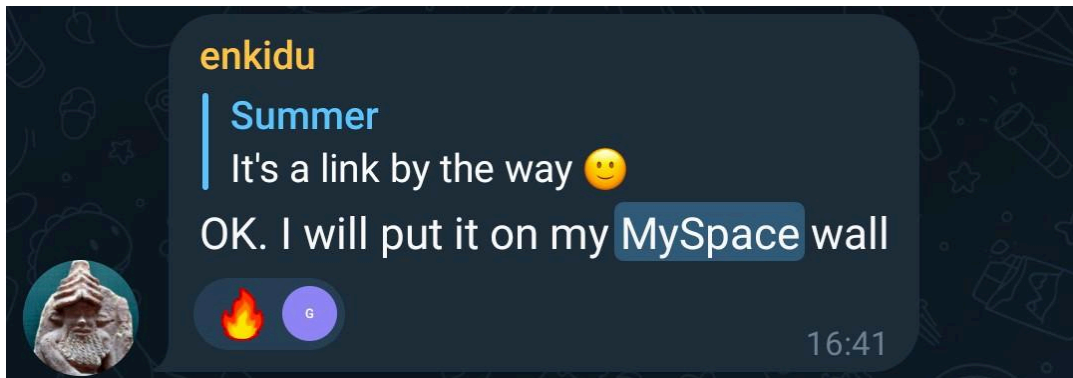

ii. It is recommended that frontends render URLs from external sources placed inside posts, or employ their own URL shortener so URLs do not destroy the character limit on CAW.

*For example if my CAW was ... "Just had some great fried fish on Point Road with @tk420 #yum #foodie #bestfrens
<https://savoryandsweetfood.com/wp-content/uploads/2013/10/20131020-164849.jpg>"*

A frontend should shorten the URL to something like 'https://c.aw/cawdev' prior to the users post, and automically render the URL as a snippet.

- Can be a clue :

Maybe he means using html? People used to customise myspace profiles with basic html code

☐ RETURN JOURNEY (unresolved)

Search for a tool

★ SEARCH A TOOL ON DCODE BY KEYWORDS:

e.g. type 'caesar'

★ BROWSE THE FULL DCODE TOOLS' LIST

- the key for the song

1 The old King had a Dream of 11 tablets Resting in the fragrant Forest **beware for the 12th in a Herring of one color Red,** they tell the story of a song that only the his true lover may hear

The archievest speaks **truest of the original 11, but not the 12th** in the broken hall of mirrors, he searches for his primal reflection.
is the secret in the song or between the melody, only the kings lover has the ears to hear **even then, sometimes he must walk backwards.**

-> red herring symbolic is a misleading clue and we have a picture of red herring in the final text
